FIG 40-TIV

CAST BODY TRANSMITTER ISOLATION VALVE

FIG 40-TIV

Fabricast Valve

- Cast stainless steel body, gate, packing gland and yoke.
- Ratchet operator standard. Lever operator available
- Fig. 40 Transmission Isolation Valve is designed for flush-mounting to tanks. Special tank side flange bolt circle allows close coupling to the tank flange.
- Gate designed to withstand full 150 PSI rated pressure as required by MSS-SP-81.
- Body cavity, seat configuration and beveled gate designed to provide shut-off capability in thick media such as pulp stock.
- Enclosed brass stem bushing provides reduced operating torque and protection of the stem bushing from harsh environments.
- O-Ring resilient seat available.
- Precision machined stainless steel gate for superior seating capability.
- Stainless steel stem for corrosion resistance.
- Tested to MSS-SP-81 specifications

Used in these industries:

- Pulp & Paper
- Industrial
- Food Processing
- Beverage
- Chemical
