Gasket Shops

- For accurate, repeatable gasket fabrication, Paramount Supply's Gasket Shops combine expert technicians with CNC cutting capabilities to meet demanding industrial specs. Superior sealing performance starts here—we cut gaskets, not corners.

Actuation / Automation

- From pneumatic and electric actuation to fully integrated control assemblies, Paramount Supply's Automation Centers provide custom-configured valve solutions that meet exact process requirements. Precision setup, verified torque outputs, and rigorous quality checks—because reliability isn't optional.

Gauge Instrumentation Shop

- From pressure instrumentation to complex assemblies, our specialists deliver certified calibration, expert repair, and meticulous quality control. Paramount Supply ensures your systems read true in every condition—precision you can trust, every time.

Pipe Cutting & Threading

- Using advanced cutting and threading equipment, our technicians produce accurate, uniform threads that meet rigorous industry specifications. Paramount Supply ensures your pipe systems assemble smoothly and perform reliably—precision you can build on.

Steam Trap Surveys

- With detailed trap-by-trap analysis, performance verification, and prioritized maintenance recommendations, Paramount Supply ensures your steam system operates safely, efficiently, and sustainably—we diagnose problems with precision, not guesswork.

Process Piping System Surveys

- From thermal performance and corrosion points to valve operation and overall system balance, Paramount Supply's Piping Process Surveys deliver the technical clarity needed for safe, efficient operation. Reliable analysis, engineered for results—because optimized systems start with accurate evaluations.

Inventory Management

- Paramount Supply's experts integrate forecasting, consumption analysis, and supply-chain coordination to maintain consistent, reliable inventory tailored to your operation. The right parts, at the right time—because efficiency starts with a system you can trust.
